

Este artículo trata sobre cómo subir emoticonos a tu wiki para hacerla mas personal.

El primer paso es:

- Crear un fichero con este texto:

```
<?php

# Emoticon MediaWiki Extension
# Created by Alex Wollangk (alex@wollangk.com)

if ( ! defined (
die ( 'This file is a MediaWiki extension, it is not a valid entry
}

global $wgHooks ;
global $wgExtensionCredits ;

$wgExtensionCredits [ 'parserhook' ] [
'name' => 'Emoticons' ,
'status' => 'stable' ,
'type' => 'hook' ,
'author' => 'Alex Wollangk (alex@wollangk.com)'
'version' => '1.0' ,
'update' => '2-20-2007' ,
'url' => 'http://www.mediawiki.org/wiki/Extension:Emoticons'
'description' => 'Enable forum-style emoticon (smiley) replacement with
) ;

$wgHooks [ 'ParserAfterStrip' ] [

// The callback function for replacing emoticons with image tags
function fnEmoticons ( & $parser
global $action ; // Access the global "action" var
// Only do the replacement if the action is not edit or history
if (
$action !== 'edit'
```

```

        &&          $action          !==          'history'
        &&          $action          !==          'delete'
        &&          $action          !==          'watch'
        &&          strpos            (            $parser          ->
        &&          $parser          ->          mTitle          ->
    )
    {
    // Get the list of emoticons from the "MediaWiki:Emoticons" article.
    $title          = Title::          makeTitle          (            8
    $emoticonListArticle =          new          Article          (
    $emoticonListArticle ->          getContent          (            )

    // If the content successfully loaded, do the replacement
    if              (            $emoticonListArticle ->          mConte
    {
    $emoticonList    =          explode          (            "
    foreach          (            $emoticonList          as          $index
    {
    $currEmoticon    =          explode          (            "/"
    if              (            count          (            $currEm
    {
    // start by trimming the search value
    $currEmoticon    [            0            ]          =
    // if the string begins with , lop it off
    if              (            substr          (            $currEm
    {
    $currEmoticon    [            0            ]          =
    }
    // trim the replacement value
    $currEmoticon    [            1            ]          =
    // and finally perform the replacement
    $text            =          str_replace          (            $currEm
    }
    }
    }
    }
    // Always a good practice to let the other hooks have their turn ... whenever it make sense.
    return          true          ;
    }

```

- Guardarlo con el nombre emoticons.php
- Guardarlo en extensions

El segundo paso:

- Bajar el fichero localsettings.php
- Modificarlo con la frase:

```
require_once ( "extensions/emoticons.php" ;
```

- Volver a subir el fichero localsetting.php

El tercer paso es:

- En tu wiki crear una pagina que se llame emoticonos
- Editarla copiando:

```
:D//[[Image:VeryHappy.gif]]
:-D//[[Image:VeryHappy.gif]]
