

Se trata de una de las compañías de hardware tal vez más concienciadas con la reducción de consumo. Comercializa unos equipos de muy bajo consumo alimentados con energía solar y equipados con software libre. Por estas tres razones me ha resultado interesante esta información que transcribo de su página web:

http://www.aleutia.com/products/e1specs.html

Se distribuyen en Reino Unido y también a nivel internacional.

E1 Hardware Details

- Processor: 200MHz x86 CPU, Memory: 128MB SDRAM, Storage: 2GB (included Compact Flash card), Power Supply (US, UK, or EU).

- 3 x USB 2.0 ports (12Mbps transfer rate), 1 x 10/100 Ethernet port, VGA port to connect LCD display (supports resolutions up to 1280x1024)

- Power consumption of 8W with CPU and SDRAM running at full speed. With external devices (USB 2.0 CD Rewriter, USB-powered hard drive) power consumption rises to 11W.

- Dimensions: 11.5cm (Width) x 11.5cm (Lenght) x 3.5cm (Height)

E1 Software Specifics

- Puppy Linux Operating System (version 2.14) - similar in appearance to MS Windows, stable, and pre-installed.

- Excel-compatible spreadsheet software (Gnumeric), Word-compatible word processor (Abiword)

What's in the Box?
